

Campus Space Advisory Council (CSAC)

The Campus Space Advisory Council (CSAC) serves as an advisory council to the Chancellor. It provides strategic analysis leading to facilities prioritization and recommendations for the campus. The work of the CSAC includes reviewing campus space inventory and utilization reports, developing recommendations for improved facilities utilization, reviewing proposals for major facilities renovations and relocations to recommend priorities, providing input on other facilities, grounds and campus space issues, communications and processes in accordance with the campus Master Plan and in coordination with IU Capital Planning and Facilities.

Membership of the CSAC is designed to ensure representation from relevant campus constituencies and CSAC members are expected to communicate with their constituencies on matters discussed by the Council. Consultation with campus constituencies informs the recommendations presented to the Chancellor. The CSAC also provides a mechanism for communication about facilities planning and priorities. Its members must develop an understanding of the facilities planning processes and contribute to the education of the entire campus regarding facilities opportunities and challenges.

CSAC members are expected to evaluate facilities projects and priorities from a holistic perspective, rather than from their own areas. Facilities recommendations should be based on meeting the overall strategic priorities of the campus. CSAC is focused on providing recommendations and setting priorities as good stewards of our buildings and grounds.

MEETINGS

The CSAC meets once a month during the academic year, but may meet more regularly as needed to conduct business. Meeting topics and recommendations the CSAC presents to Chancellor will be posted online.
